Field No.10 Pathway Woodchip

Product Specification

## Field No. 10 Pathway Woodchip

### Description

High quality graded softwood chip sourced locally from sustainable sources in East Anglia. Suitable for a multitude of uses:

- Garden paths and walkways
- Chicken runs/animal pens
- Horse gallops/menages

### Product Benefits

- **Field No.10** Hard wearing and will last for up to 4 years.
- **Field No.10** Offers a clean, slip resistant surface that is soft and comfortable to walk on.
- **Field No.10** FSC Certified.
- **Field No.10** Suppresses the growth of existing perennial weeds and resists colonisation by annual weed seeds.
- **Field No.10** Allows for clean access to planted areas whilst resisting soil compaction from foot traffic.

- **Field No.10** Very free draining and holds moisture in the soil reducing the need for irrigation.
- **Field No.10** Adds an insulating layer to the planted area resisting climatic extremes of freezing/drought conditions.

### How much do I need?

Measure the approximate surface area you need to cover.

2. Decide how deep you wish to install the wood chip. For best results 50mm – 100mm is recommended.
3. 1m<sup>3</sup> of this product will be sufficient to cover the following surface area:

Depth of mulch:	50mm	75mm	100mm
Area covered:	20m <sup>2</sup>	13.33m <sup>2</sup>	10m <sup>2</sup>

Alternatively, we have a handy volume calculator on the Field Compost Ltd website or give us a call with the dimensions of the area you wish to mulch, and we will do the calculations for you.

See overleaf for typical physico-chemical properties and nutrient content

**Field No.10 Pathway Woodchip**

**Product Specification**

## Directions for use as mulch

1. Clear weeds from the area ahead of planting, thorough hand weeding is particularly effective.
2. Prepare and cultivate the root zone. The addition of Field No. 1 Organic Soil Improver, Field No.12 Nutrimulch or Field No.25 Maximulch is recommended at this stage.
3. To further reduce maintenance requirements and to increase mulch life a geo-textile mat can be laid ahead of planting.
4. Plant area.
5. Spread Field No.9 evenly at a depth of between 50mm and 100mm (2 to 4 inches) allowing at least 10% for settlement.
6. For best results reduce disturbance of mulch once installed.
7. For best results top up levels every 12 months.

## Directions for use as walkway surface

1. Clear and mark out area of walkway.
2. Excavate area to accommodate the installation of woodchip to required. Alternatively pathway edging can be used to elevate the walkway above ground level.
3. On areas that are poorly drained, it may be necessary to install a drainage area beneath the woodchip.
4. Install a heavy duty geotextile membrane beneath the area on which the wood chip will be installed.
5. Install woodchip to the depth required.
6. Field No.10 is manufactured from natural timber residues and as such may contain a small quantity of wood shards with sharp edges. It may be considered necessary to remove any pieces considered unsafe by hand prior to the pathway being used.

## Technical Information

Product constituent	100% softwood chips
Origin	UK
Particle Size Range (Nominal)	5-25mm
White wood content	<85%
Fines content	Minimal
pH	5.0 – 6.0
Bulk Density	250 – 300kg/m <sup>3</sup>
BS EN 4790 Fire Resistance tested	No
BS EN 1177 Tested for impact resistance under play equipment	No
FSC Certified	Yes
